Statmon Technologies Corp. and Pixelmetrix Announce Worldwide OEM Partnership For Pixelmetrix's *"ConsolidatorPlus"*, the Ultimate Test and Measurement, Control and Facility Management Tool for DTV Broadcasters

Singapore, December 2005 - Statmon Technologies Corp., (OTCBB:STCA - News, www.statmon.com), a leader in IP network-based monitoring, control and remote facility management solutions, and Pixelmetrix Corporation Pte Ltd, a global expert in preventive monitoring for digital television, jointly announce the recent completion a formal worldwide OEM agreement.

Built upon "Axess", the powerful network management infrastructure platform from Statmon, Pixelmetrix has launched the flagship *ConsolidatorPlus*. Interfacing with the Pixelmetrix DVStation monitoring platform, the system is able to collect and concentrate network performance and fault information across wide multiple systems and geographies. The product comes as a ready-to-go shrink wrapped solution or can be customized to individual requirements – providing the ultimate solution for preventive, proactive monitoring and facilities management utilizing a common platform at the regional, national and global levels.

"The Pixelmetrix - Statmon partnership is a highly powerful technology and business combination", says Geoffrey Talbot, the CEO of Statmon Technologies Corp., who went on to say, "The first European shipments are rolling out the door and we see the Pixelmetrix collaboration as a strategic international sales channel for Statmon. The *ConsolidatorPlus* - DVStation/Axess combination is the first of many exciting break-out product opportunities.

Danny Wilson, the CEO of Pixelmetrix adds, "Our relationship with Statmon is proving to be highly productive and exciting. Our respective technology teams are working very effectively together and we are leveraging off each other's leading edge product development strategies. Input from our respective customer relationships provides powerful leverage for the technology road map and the over-the-horizon solutions we have coming down the product development pipe line".

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVShift, DVShift-HD, and DVStor.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStor, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
