

Press Release

DVStation™ wins the Peter Wayne Award 2000 for Design and Innovation at IBC2000

September 26, 2000 - Developed by Pixelmetrix Corporation, a promising and strategic high technology company started in Singapore, DVStation™, has emerged from the many award entries to be the winner of the Peter Wayne Award 2000 for best and most innovative design, in the recently held in International Broadcasting Convention 2000 (IBC 2000). Previous winners of the award includes Panasonic Broadcast, Avid Technology, Quantel and NTL.

DVStation™ is the first product of its kind to provide integrated supervision of up to 21 ports to detect the source of picture impairments. The system was designed to operate on a parallel processing architecture and runs on Linux operating system.

Pixelmetrix Corporation, was one of the eight companies to receive the Venture Investment Support for Start-ups (VISS) from the Singapore's National Science & technology Board (NSTB) in March 2000.

"We are proud to have achieved a major win and recognition from the international community for our innovation" says Danny Wilson, president of Pixelmetrix.

With the potential of the digital broadcast test equipment market, talents from a wide range of background, including broadcasting, telecommunications, large scale IT, and process control have come from different countries and joined the start-up since the company was formed in June 1999. Currently, there are staffs from Japan, Canada, Malaysia, India, Germany, China and Singapore working for Pixelmetrix thus making it a multi-national company.

Unveiled at NAB 2000, DVStation™ has been extremely well received. To date, Pixelmetrix has established sales offices in North America and Europe. DVStation™ has exclusive distributors in U.K, Germany, Japan and Korea.

About the IABM

Established in 1976, the IABM exists to foster the interests of broadcast equipment manufacturers and suppliers of broadcast-related services.

The Peter Wayne Award for Design & Innovation was inaugurated in 1990 in memory of the IABM's late deputy chairman. Sponsored by the International Association of Broadcast Manufacturers (IABM), the Peter Wayne Award is being awarded every year at IBC. The judging panel for this year were David Bradshaw, Peter Smith of NBC, Aleksander Todorovic of IAB, Akihiro Hori of Nippon Television, and Gianfrano Barbieri, formerly of RAI.

About Pixelmetrix

Pixelmetrix Corporation focused on providing specialized instruments to the digital video broadcast industry. Pixelmetrix applies telecom network management and test techniques to enable a smoother transition to digital broadcasting. It employs experts in telecom, broadcasting, and the Internet and combines their strengths to design innovative solutions for the new digital networks.
